Subject: Request for Extension of Certification Deadlines under Ontario Regulation 343/22

Dear Fire Marshal Pegg,

On behalf of The Corporation of the Township of Larder Lake we are writing to express our support for the firefighter certification requirements outlined in Ontario Regulation 343/22. We recognize the importance of standardized training and certification in enhancing firefighter safety, service quality, and public confidence across the province.

When firefighter certification was first introduced in 2018, many rural municipalities voiced concern, noting that they do not offer the same level of fire protection services as larger municipalities or urban centres. The Province graciously responded by introducing legislation to allow municipalities to certify firefighters only to the services they actually provide. This flexibility is greatly appreciated and reflects a thoughtful understanding of the diverse realities across Ontario.

However, despite this accommodation, training programs for many of these service-specific certifications are still not available or are only in "pilot" while there remains a large demand for these programs. The Province cannot reasonably expect volunteer firefighters—many of whom work full-time jobs—to independently develop training programs that meet the standards required to pass certification exams. This places an undue burden on small municipalities and risks compromising the intent of the regulation.

We have enclosed a formal resolution passed by our Council, which outlines our concerns and respectfully requests that the province extend the certification deadline to a minimum of two years beyond the final release date of the Ontario Seal programs offered in the regulation to allow time for volunteer fire departments to access these training programs and achieve certification.

We also urge the Province to consider a phased adaptive approach to implementation, ensuring that all communities have equitable access to the necessary training resources.

We appreciate your leadership and commitment to fire service excellence and look forward to your support in helping Ontario municipalities meet these important standards in a realistic and sustainable manner.

Sincerely,

RE: Resolution #17, September 9, 2025 – Request for Extension of Certification Deadlines under Ontario Regulation 343/22

Please be advised that at the Township of Larder Lake's Regular Council Meeting held on Tuesday, September 9th, 2025, the following resolution was adopted:

Moved by: Councillor Kelly

Seconded by: Councillor Armstrong

CARRIED

WHEREAS Ontario Regulation 343/22 mandates that firefighters performing specific fire protection services be certified to a prescribed standard by July 1, 2026, with certain technical rescue disciplines requiring certification by July 1, 2028;

AND WHEREAS the Township recognizes and supports the value of the certification requirements mandated by the Province of Ontario, acknowledging that standardized training enhances firefighter safety, service quality, and public trust;

AND WHEREAS the Office of the Fire Marshal (OFM) and Ontario Fire College (OFC) are actively working to provide training and certification programs, including offering over 600 courses annually, yet some certification programs and testing resources remain under development or are not yet widely accessible, particularly in the Ontario Seal Programs;

AND WHEREAS many fire departments in Ontario are staffed predominantly by volunteer firefighters who balance full-time employment with their emergency service commitments;

AND WHEREAS the certification programs are still in development and the current availability does not adequately reflect the operational realities of volunteer fire departments, especially in rural communities, where training opportunities are limited and certification demands place undue pressure on personnel and municipal resources;

AND WHEREAS when firefighter certification was first introduced in 2018, smaller/rural Municipalities raised concerns that they do not provide the same level of fire protection services as larger municipalities or urban centres. The Province responded thoughtfully by introducing new legislation to allow municipalities to certify firefighters only to the services they actually provide. This flexibility is appreciated and reflects a fair and practical approach; however, training programs for many of these service-specific certifications are still not available.

AND WHEREAS it is unreasonable to expect volunteer firefighters—who already balance full-time employment and community service—to independently develop curriculums and training programs in-house that meet provincial standards and adequately prepare them for certification exams;

AND WHEREAS smaller rural volunteer fire departments often lack the necessary resources, certified personnel, and specialized expertise to independently develop training curriculums or qualify for learning contracts with the Ontario Fire College; and

AND WHEREAS these departments have long relied on the Ontario Fire College's course offerings and have been patiently awaiting the release of the Ontario Seal Programs, having noted preliminary pilot initiatives in Northern Ontario and anticipating a broader rollout of these programs in the near future;

AND WHEREAS rural municipalities would welcome the opportunity to engage in dialogue with the Office of the Fire Marshal to address current barriers and explore collaborative solutions;

THEREFORE BE IT RESOLVED THAT the Council of the **Township of Larder Lake** respectfully requests that the Province of Ontario, through the Ministry of the Solicitor General and the Office of the Fire Marshal, extend the compliance deadlines outlined in Ontario Regulation 343/22 to a minimum of two years beyond the final release date of the Ontario Seal programs offered in the regulation for all affected certification categories;

AND THAT the Province consider implementing a phased or regionally adaptive approach to certification deadlines, taking into account the availability of training programs and the unique challenges faced by volunteer fire services in Rural Ontario;

AND THAT this resolution be forwarded to the Minister of the Solicitor General, the Ontario Fire Marshal, the Association of Municipalities of Ontario (AMO), the Rural Ontario Municipal Association (ROMA), the Ontario Association of Fire Chiefs (O AFC), **John Vanthof** and all municipalities in Ontario for support and endorsement.

Sincerely,

A handwritten signature in black ink, appearing to read 'Crystal Labbe', written in a cursive style.

1.0 INTRODUCTION

Pinchin Ltd. (Pinchin) was retained by the Township of McGarry (the Township) to complete a Waste Capacity Assessment (WCA) for the McGarry Waste Disposal Site (the Site) located in McGarry, Ontario. The purpose of completing the WCA was to determine the existing and remaining waste capacity of the Site. This WCA is also intended to support an evaluation of lifespan for the Site via the calculation of the estimated annual waste deposition rate.

1.1 Scope of Work

The scope of work to be completed for the waste capacity study is outlined in Pinchin's proposal entitled "*Proposal for Aerial UAV/RPAS Topographic Survey and Waste Capacity Review, McGarry Waste Disposal Site, Virginiatown, Ontario*", dated January 7, 2022. The scope of work completed by Pinchin included the following:

1.1.1 Topographic Survey

- Pinchin completed a topographic drone survey to document the current Site conditions through the collection of georeferenced imagery. The unmanned aerial vehicle (UAV) is capable of covering vast amounts of terrain through waypoint flight plans to capture high resolution images for further processing;
- The images obtained from the UAV were used to develop a digital elevation model and Digital Terrain Model (DTM); and
- A waste volume calculation was estimated using the information collected during the during the UAV topographic survey.

1.1.2 Waste Capacity Assessment

A waste capacity assessment was prepared containing:

- A summary of background and analysis of available information on the Site as it relates to capacity;
- An analysis of the 2022 topographical survey;
- An estimated annual deposition rate; and,
- A summary of findings including the remaining Site life in years (theoretical lifespan), calculation of remaining years until the Site reaches capacity based on the estimated deposition rate.

1.2 Background

1.2.1 Site Document Review

Pinchin reviewed the following historical reports for the Site and are referenced within this document:

- Report entitled "*The Corporation of the Township of McGarry, Virginiatown, Ontario, Site Design and Operations Plan for McGarry Sanitary Landfill*" prepared for The Corporation of the Township of McGarry by Hatch, dated August 12, 1999 (1999 D&O Plan);
- Memorandum entitled "*The Township of McGarry – McGarry Township Landfill Site, 2013 Annual Monitoring Report, ECA Number: A572402*" issued by Thomas Guo, Regional Hydrogeologist (in-training), Technical Support Section, Northern Region of the MOECC to Steven Momy, Senior Environmental Officer, Timmins District Office of the MOECC (the 2013 Thomas Guo Memo);
- Letter entitled "*Voluntary Abatement Plan, McGarry Landfill, McGarry Township, Ontario*" prepared for the Township of McGarry by Pinchin dated January 21, 2016 (Abatement Plan);
- Letter entitled "*Environmental Peer Review and Operations Evaluation, McGarry Waste Disposal Site, Township of McGarry, Ontario*" prepared for the Township of McGarry by Pinchin, dated June 20, 2016 (Peer Review);
- Letter entitled "*Update Letter: Environmental Consulting Services 2016 – 2018, McGarry Waste Disposal Site, McGarry Township, Ontario*" prepared for the Township of McGarry by Pinchin, dated June 20, 2016 (Update Letter);
- Report titled "*Design & Operations Plan, McGarry Waste Disposal Site, Township of McGarry, Ontario*" completed by Pinchin, dated September 29, 2017 (the 2017 D&O Plan); and
- Report entitled "*2019 Landfill Closure and Post-Closure Care Liability Estimate, McGarry Waste Disposal Site, Township of McGarry, Ontario*" completed by Pinchin, dated October 23, 2019 (the 2019 Liability Estimate).

1.2.2 Site Location

The Site is located approximately 4 kilometres (km) east of Virginiatown, Ontario, along the border between Québec and Ontario. The Site is accessed via a gravel road that extends off Raven Mountain Road, south of Highway 66. The area that the Site is situated in is a rural setting where land use within 1 km of the Site is predominantly vacant forested Crown land. The former Raven Mountain Ski Facility area is located approximately 1 km southwest and Highway 66 is approximately 1 km north of the Site.

The Site is located at Universal Transverse Mercator (UTM) coordinates Zone 17U, 609,800 metres (m) Easting and 5,332,529 m Northing (North American Datum (NAD) 1983). Landfill coordinates were obtained from Google Earth.

The Site location is presented on Figure 1 (All Figures are provided in Appendix I).

1.2.3 Geological Conditions

The Site is located on the boundary of an esker which consists of sand and gravel deposits approximately 100 m thick, deposited by glacial meltwater that was flowing beneath or within the glacier. The quaternary geology of the Site is mapped as Cenozoic Glaciolacustrine shallow water deposits of sand with minor gravel. This sand is typically fine to medium grained although silty and/or coarse layers are commonly encountered. Based on Pinchin's review of the boreholes advanced at the Site, the soil consists of medium grained and silty sand.

The topography of the Site gently slopes toward the middle of the Site and westward toward the Milky Creek drainage area. Milky Creek is located approximately 500 m west of the Site. The landfill area is located in the drainage area of a tributary to Milky Creek. Pit development and sand extraction has resulted in a flat, level site for fill placement surrounded by a sand bluff. An average topographic surface elevation of 320.5 meters below sea level (masl) was identified across the areas of the Site inferred to be undisturbed by historical waste fill operations.

1.2.4 Site Description and Development

This Site was originally approved in 1973 for the use and operation of a landfill site for the disposal of solid, non-hazardous domestic and commercial wastes. According to the "*Operation and Maintenance Manual for McGarry Landfill*" prepared by Hatch Ltd. (Hatch) dated August 12, 1999 (the 1999 Design and Operations Plan (D&O) Plan). The 1999 D&O Plan states that the Township had been transferred a 7.43 hectare (ha) property earlier in the year by the Ministry of Natural Resources (MNR), comprising the southern portion of a former sand and gravel extraction pit and some adjacent land. The walls of the pit, prior to landfilling, were reportedly 3 to 3.6 metres high, and the base reportedly comprised of silty sand.

The original Site D&O Plan was reportedly prepared by Heathwood Engineering Associated Limited. The Site is operated under Ministry of the Environment, Conservation and Parks (MECP) Provisional Certificate of Approval (CofA, now referred to as an Environmental Compliance Approval (ECA)) Number **A572402**, issued August 20, 1980, for a 35 ha landfilling site for the disposal of solid, non-hazardous domestic and commercial wastes. A copy of the most recent CofA is provided in Appendix II. The Site is also subject to Ontario Regulation 347 and the existing requirements under the *Environmental Protection Act*. Waste disposal is limited to that generated and collected from the communities of Kearns and Virginiatown.

While it is not explicitly stated within files available to Pinchin for review, satellite imagery from December 1985 suggests that the increased Site area to 35 ha with the Provisional CofA encompassed the remainder of the sand and gravel extraction pits, north of the southern extraction pit comprising the initial 7.43 ha property transferred to the Township. The CofA indicates that the Site is to be operated in accordance with a Site Plan dated February 8, 1977, and a Surveyor's Certificate prepared by Pit, Blackburn, Ontario Land Surveyors dated July 2, 1974. These documents have not been provided to Pinchin for review at the time of preparation of this report.

On October 29, 1998, the MECP issued an Inspection Report that included a request that the Township update their Site Plan and their Operational and Maintenance Plan as an action item, this request had also been requested during previous inspections. It is Pinchin's understanding that the 1999 D&O Plan is the current approved D&O Plan for the Site.

Hatch outlines four distinct fill areas in their 1999 D&O Plan, a large primary area at the south side of the Site (fill area 1), a small abandoned area at the southwest side of the Site (fill area 2), a fill area at the northeast end of the Site for scrap metal storage (fill area 3), and a fill area on the north end of the Site (northeast of fill area 1) designated for the disposal of demolitions materials (fill area 4). Landfilling was progressing from fill area 1 northward towards fill area 4 in 1999. Hatch states that all cover material is taken from the banks of the pit. A drainage ditch was excavated in May 1999 to address localized ponding at the western toe of fill area 1, redirecting surface runoff westward and improve site drainage. The Site boundary was cleared in the fall of 1998. This work involved clearing the entire perimeter (property line) of the Site to improve site definition, access and regulatory compliance.

In 2014, the MECP conducted a groundwater-related review of the 2013 annual monitoring report prepared by A&A Environmental Consultants Inc. (A&A) for the Site to evaluate on and off-Site groundwater impacts, as well as compliance with provincial regulations. The review was summarized in the 2014 Thomas Guo Memo. Mr. Guo indicated that contaminated leachate was migrating off the established contaminant attenuation zone (CAZ) for the Site. Based on this conclusion, it was recommended that the Township investigate mitigation measures, including expanding the CAZ with additional downgradient land and replacing the assumed background monitoring well (MW1) with a new background monitoring well.

On January 21, 2016, Pinchin submitted a Voluntary Abatement Plan to the Township, outlining a comprehensive three-year strategy aimed at supporting the Township's long-term waste disposal needs, addressing MECP concerns and ensuring economic feasibility. As part of the plan's implementation, several key actions were undertaken, including an Environmental Peer Review and Operations Evaluation to assess historical Site impacts and regulatory compliance, the completion of Annual Monitoring Programs and Reports from 2016 to 2020, a monitoring well elevation survey, the

development of a Design and Operations (D&O) Plan along with a Waste Capacity Assessment, and the preparation of an updated Voluntary Abatement Plan. The design incorporated a maximum slope of 4:1 (horizontal to vertical) and a minimum slope of 20:1 to facilitate proper drainage and long-term site stability. The D&O Plan states that the buffer area at the Site consists of wooded, undeveloped areas, however, a formal CAZ has not been established for the Site.

2.0 WASTE AREAS AND VOLUMES

2.1 Previous Waste Capacity Assessments

A waste capacity assessment was originally performed in the "*Site Design and Operations Plan for McGarry Sanitary Landfill*" prepared by Hatch Ltd. (Hatch) dated August 12, 1999. Based on survey work conducted by Hatch in December 1998, they estimated that approximately 76,120 cubic meters (m³) or 27,403 tonnes (based on a specific weight of 360 kg/m³ of compacted solid waste) had been landfilled. The remaining landfill Site capacity was estimated to be 24,000 m³ or 8,650 tonnes of compacted solid waste, based on their survey results and a 4:1 waste to cover ratio. A remaining lifespan of 19 years was estimated using a weekly disposal rate of 7 tonnes of uncompacted waste (based on a specific weight estimated of 200 kg/m³ of uncompacted solid waste).

Since there is no permitted volume specified within the CofA, the 2017 D&O Plan specifies that the available capacity remaining at the Site is therefore dependent upon the 35 ha area approved for landfilling. Based on information provided by the Township, the 2017 D&O Plan reports that the majority of the waste deposited at the Site is collected at roadside once a week using a 9-yard compacting garbage truck and typically two full loads of compacted garbage is collected (approximately 14 m³ per week). Based on this estimate, an annual collection rate of 730 m³ per year was estimated. A remaining landfill lifespan was estimated to exceed 75 years by Pinchin, subject to periodic reviews and operational adjustments.

The 2019 Liability Estimate states that a revised waste capacity estimate was calculated using the available data from the 2017 D&O plan, resulting in an estimated 202,914 m³ of existing fill. The report divides the Site into an approximate 15.4 ha area on the west end and an approximate 19.6 ha area on the east end with final slope contours of 4 horizontal to 1 vertical (4:1) and 20:1, respectively. Using these slope constraints and the full 35-hectare permitted footprint, the theoretical maximum fill volume was recalculated using a fill height of 2 m for the western area and a fill height of 3 m for the eastern portion of the Site, was calculated to be 811,656 m³.

2.2 Updated Waste Capacity Assessment

2.2.1 Topographic Survey

Pinchin completed the topographic survey of the Site on August 17, 2022. Using a Transport Canada Compliant UAV/RPAS, the DJI Matrice M300 enterprise-grade UAV consisting of a rotary wing platform equipped with a DJI P1 high resolution RGB camera and an Emlid RS2 GNSS RTK base station. Pinchin surveyed the location of the waste deposits, access road, major landmarks and surficial topography. The results of the survey data were utilized to support the waste capacity calculations for the Site. Civil3D was utilized to process the UAV data and produce a 3D model. Global Mapper was then used to generate a DTM and topographic contours. The Site topography from the 2022 survey is illustrated on Figure 2.

2.2.2 In-Place Volume

As discussed in Section 1.2.4, the landfill was originally developed by infilling the former sand and gravel excavations in the pit base and the fill area advanced by pulling material from the pit edge for waste cover. Thus, using the August 2022 aerial UAV survey and identifying the assumed historical waste areas and an estimated an average of 3.3 m of waste below the inferred natural Site grade (i.e., 320.5 masl), a new in-place waste estimate of 231,605 m³ was determined.

2.2.3 Remaining Capacity and Fill Rate

Comparing the estimated in-place volume to the previously estimated total Site capacity of 811,656 m³, gives a total remaining available capacity estimate for waste deposition at the Site of 580,051 m³ (as of 2022) However, as a result of the revised historical fill area footprints differing between the 2017 D&O Plan, comparing the estimated 202,914 m³ of existing fill to the recent estimate of 231,605 m³ is not considered a viable option for determining the average annual waste deposition. The annual collection rate of 730 m³ per year estimated in the 2017 D&O Plan also appears to be fairly high based on the population size and the rate of waste filling observed at the Site. Accordingly, the average annual waste deposition volume was calculated according to the available population statistics. In 2021, the Township population was 579, according to Statistics Canada; which was a 4.9 percent decrease in residents between 2016 and 2021. Using an average per capita waste generation rate of 1 kg/person/day, the 2021 population of 579 residents, an "airspace utilization factor" of 593 kg/m³ for compacted solid waste (a specific waste density of 593 kg/m³ provided in the 2019 Liability Report) and a 4:1 waste to cover ratio (including interim and final cover material) results in a fill rate of approximately 445.5 m³ per year according to 2021 population estimates.

Based on these projections the current 2025 in place volume is estimated to be approximately 232,942 m³, resulting in a remaining capacity of approximately 578,715 m³.

2.2.4 *Lifespan*

Utilizing the value estimated for remaining available waste disposal volume (578,715 m³) and the average annual waste deposition rate (approximately 445.5 m³ per year), the estimated remaining theoretical lifespan of the Site (based solely on volume capacity) is in excess of 100 years, as of August 2025. It is important to note that waste deposition is somewhat variable, resulting in changes to the average annual deposition rate used to calculate remaining site life. The remaining site lifespan estimate assumes that the waste deposition rate remains constant, and that the Site is developed to the maximum capacity assumptions of this assessment. It is recommended that regular annual topographic surveys of the waste disposal area be undertaken in order to more accurately estimate the average annual waste deposition rate if additional accuracy pertaining to the Site life estimates are required.

3.0 CONCLUSIONS

The following is a summary of the findings of the WCA:

- The Site has a 35 ha permitted footprint to be utilized for disposal of solid, non-hazardous domestic and commercial waste;
- Per the 2019 Liability Estimate, the theoretical maximum fill volume was calculated to be 811,656 m³, using the proposed slope and height constraints (2 m height at 4:1 slope and 3 m height at 20:1 slope);
- The current remaining capacity of the Site has been estimated as approximately 578,715 m³;
- Using population statistics, Pinchin has assumed an average annual deposition rate of approximately 446 m³ of waste material (compacted waste and cover material) per year; and
- Based on the estimated remaining capacity of 578,715 m³, and the average annual estimated deposition rate of waste material of approximately 446 m³ per year, the estimated remaining life span of the Site is over 100 years.

4.0 LIMITATIONS

This WCA was performed for the Township of McGarry (Client) in order to investigate the remaining capacity at the McGarry Waste Disposal Site (Site). The term recognized environmental condition means the presence or likely presence of any hazardous substance on a property under conditions that indicate an existing release, past release, or a material threat of a release of a hazardous substance into structures on the property or into the ground, groundwater, or surface water of the property. This WCA

does not quantify the extent of the current and/or recognized environmental condition or the cost of any remediation or corrective measure.

Conclusions derived are specific to the immediate area of study and cannot be extrapolated extensively away from sample or test pitting locations.

No environmental site assessment can wholly eliminate uncertainty regarding the potential for recognized environmental conditions on a property. Performance of this WCA to the standards established by Pinchin is intended to reduce but not eliminate uncertainty regarding the potential for recognized environmental conditions on the Site and recognizes reasonable limits on time and cost.

This WCA was performed in general compliance with currently acceptable practices for environmental site investigations and specific Client requests as applicable to this Site.

This report was prepared for the exclusive use of the Client subject to the terms, conditions and limitations contained within the duly authorized proposal for this project. Any use which a third party makes of this report, or any reliance on or decisions to be made based on it is the sole responsibility of such third parties. Pinchin accepts no responsibility for damages suffered by any third party as a result of decisions made or actions conducted.

If additional parties require reliance on this report, written authorization from Pinchin will be required. Pinchin disclaims responsibility of consequential financial effects on transactions or property values, or requirements for follow-up actions and costs. No other warranties are implied or expressed. Furthermore, this report should not be construed as legal advice. Pinchin will not provide results or information to any party unless disclosure by Pinchin is required by law.

Pinchin makes no other representations whatsoever, including those concerning the legal significance of its findings, or as to other legal matters touched on in this report, including, but not limited to ownership of any property, or the application of any law to the facts set forth herein. With respect to regulatory compliance issues, regulatory statutes are subject to interpretation and these interpretations may change over time.

RE: Resolution #18, September 9, 2025 - Resolution Requesting a Moratorium on Aerial Spraying of Glyphosate in the Timiskaming Forest

Please be advised that at the Township of Larder Lake's Regular Council Meeting held on Tuesday, September 9th, 2025, the following resolution was adopted:

Moved by: Councillor Armstrong

Seconded by: Councillor Kelly

CARRIED

WHEREAS the Province of Ontario, through the Ministry of Natural Resources and Forestry, plans to begin aerial spraying of glyphosate-based herbicides starting on or before August 10th, 2025, in the Timiskaming Forest; and

WHEREAS the Timiskaming Forest covers a significant portion of the Municipality of Larder Lake, and this activity may impact residents and ecosystems; and

WHEREAS new scientific evidence published since Health Canada's last assessment of glyphosate in 2017 has linked glyphosate-based end-use products to cancer, metabolic and neurological diseases, reproductive toxicity, and ecosystem harm; and

WHEREAS the Province of Quebec banned the use of glyphosate for forestry purposes in 2001 and replaced aerial herbicide spraying with manual forest thinning as a safer alternative forest management method; and

WHEREAS many residents have expressed concern regarding the potential environmental and public health risks associated with aerial spraying of glyphosate-based herbicides;

NOW THEREFORE BE IT RESOLVED THAT the Council of the Municipality of Larder Lake formally requests that the Honourable Mike Harris Jr., Minister of Natural Resources and Forestry, reconsider the planned use of glyphosate-based herbicides in the Timiskaming Forest and suspend the aerial spraying initiative until further independent research and updated risk assessments are completed and reviewed; and

BE IT FURTHER RESOLVED THAT this resolution be forwarded to:

The Honourable Mike Harris Jr., Minister of Natural Resources and Forestry

The Honourable Sylvia Jones, Minister of Health

MPP John Vanthof, Timiskaming–Cochrane

AMO (Association of Municipalities of Ontario)

FONOM (Federation of Northern Ontario Municipalities)

All municipalities within Northeastern Ontario

RE: Resolution – Request for Delegations at the Federation of Northern Ontario Municipalities (FONOM's) Annual Conferences

Please be advised that at the Township of Larder Lake's Regular Council Meeting held on Tuesday, July 8th, 2025, the following resolution of support was adopted:

Moved by: Councillor Hull

Seconded by: Councillor Kelly

WHEREAS the Federation of Northern Ontario Municipalities (FONOM) Conference takes place every year at different locations in Northeastern Ontario;

AND WHEREAS these conferences have become an excellent forum for municipal leaders to engage with Ministers of the Crown regarding their communities' challenges;

AND WHEREAS the opportunity to delegate to Ontario Provincial Ministers is not currently part of the FONOM conference agenda, unlike other conferences such as Rural Ontario Municipal Association (ROMA), Ontario Good Roads Association (OGRA), and the Association of Municipalities of Ontario (AMO);

AND WHEREAS, not having Northeastern Ontario communities able to delegate is a missed opportunity for the municipal leaders in attendance to truly engage with the specific challenges of their northern municipalities;

NOW THEREFORE BE IT RESOLVED THAT the FONOM Executive consider placing on their yearly conference agenda the opportunity for Northeastern Ontario municipalities to delegate to Ontario Provincial Ministers, in a format similar to the AMO Conference;

AND FINALLY THAT a copy of this Motion be sent to FONOM, to all Members of Provincial Parliament, and municipalities within Northeastern Ontario for support.

Carried

As so directed, a copy of Council's Resolution has been supplied above for your reference.

Sincerely,

A handwritten signature in black ink, appearing to read 'Crystal Labbe', written in a cursive style.

To : Virginiatown Mayor & Council

re: Request for use of rooms; McGarry Recreational Center

Dear Mayor & Council,

Le Centre de santé communautaire du Témiskaming (CSCT) is proud to offer clinical and community services in the municipality of Virginiatown.

We much appreciate the current collaboration between the municipality and CSCT to offer community activities that aim to improve the health and wellbeing of the community.

For the coming year, we would like to continue to use the kitchen and community room (XYZ) for a Lunch and Learn activity. The sessions are facilitated by a dietitian and a community worker, with the goal of reducing food insecurity and improving cooking skills. Participants cook and enjoy a healthy meal together and discuss various topics related to healthy eating and nutrition. Participants greatly appreciate this concept and wish to continue in the same way. As always, we make sure to leave the facility impeccable.

The activity takes place 1/month and is offered free of charge to the community. We suggest the following dates (Tuesdays):

- | | |
|--------------------|------------|
| ○ October 7, 2025 | ○ March 10 |
| ○ November 4 | ○ April 14 |
| ○ December 2 | ○ May 12 |
| ○ January 13, 2026 | ○ June 4 |
| ○ February 10 | |

It would be ideal to have access from 9:30 am until 2:30 pm.

A partnership between various organizations makes it possible to work together for the wellbeing of the community.

A response as soon as possible would be appreciated. You can contact Marie-Lyne Plouffe or Carole Godmaire at 705-567-1414.

Best regards,

Jocelyne Maxwell
Executive Director

Attention : Conseil municipal de Virginiatown

Sujet : demande d'utilisation de salle; centre récréatif McGarry

Chers mairesse et membres du conseil,

Le Centre de santé communautaire du Témiskaming (CSCT) est fier d'offrir des services cliniques et communautaires dans la municipalité de Virginiatown.

Nous apprécions grandement la collaboration actuelle entre la municipalité de Virginiatown et le CSCT afin d'offrir des activités communautaires qui visent le bien-être de la communauté.

Pour l'année à venir, nous aimerions pouvoir continuer à utiliser la cuisine et la salle communautaire (XYZ) pour notre activité de diner-causerie. Les sessions sont animées par une diététiste et une travailleuse communautaire, dans le but de réduire l'insécurité alimentaire et améliorer les habiletés culinaires. Les participants ont la chance de cuisiner et déguster ensemble un repas santé en plus de discuter de différents sujets concernant l'alimentation saine et la nutrition. Les participants apprécient grandement ce concept et souhaite poursuivre de la même façon. Comme toujours, nous nous assurons de remettre les lieux impeccables.

L'activité a lieu une fois par mois et est offerte gratuitement à l'ensemble de la communauté. Nous proposons les dates suivantes (mardis):

- | | |
|---------------------------|------------|
| ○ 7 octobre 2025 | ○ 10 mars |
| ○ 2 ^e novembre | ○ 14 avril |
| ○ 2 décembre | ○ 12 mai |
| ○ 13 janvier 2026 | ○ 4 juin |
| ○ 10 février | |

Il serait idéal d'avoir accès dès 9h30 et ce jusqu'à 14h30.

Un partenariat entre les différents organismes permet de travailler ensemble pour le bien-être de la communauté.

Une réponse dans les plus brefs délais serait appréciée. Vous pouvez contacter Marie-Lyne Plouffe ou Carole Godmaire au 705-567-1414.

Cordialement,

Jocelyne Maxwell

To : Virginiatown Mayor & Council

re: Request for use of rooms; McGarry Recreational Center

Dear Mayor & Council,

Le Centre de santé communautaire du Témiskaming (CSCT) is hoping for your continued support to use of the McGarry Community Centre for community exercise sessions for adults 55+. The schedule is as follows:

- Moderate intensity exercises: Mondays and Wednesdays from 11 h 15 to 12 h 15
- Higher intensity exercises: Mondays and Wednesdays from 12 h 15 to 1 h 15

These classes have been offered for many years, and they are facilitated by a trained Community Health Worker. 30 minutes are typically needed before and after the classes to set up and take down.

Participants appreciate the classes and hope to continue in the same manner. These activities are offered free of charge to the community for every month of the year. As always, we make sure to leave the facility impeccable.

We would also appreciate continued access to storage for the related equipment. Up to now, it has been stored and locked in a room near the kitchen.

For more details, you may contact Carole Godmaire, Community Health Worker at 705-567-1414.

Your collaboration is much appreciated to continue working together for the wellbeing of the community.

We thank you in advance for your consideration,

Jocelyne Maxwell
Executive Director

Le 19 septembre 2025

Attention : Conseil municipal de Virginiatown

Sujet : demande d'utilisation de salle; centre récréatif McGarry

Chers mairesse et membres du conseil,

Le Centre de santé communautaire du Témiskaming (CSCT) sollicite votre appui pour poursuivre l'utilisation du Centre communautaire de McGarry pour la continuation des sessions d'exercices offertes à la communauté selon l'horaire suivant :

- Exercices modérés : les lundis et mercredis de 11 h 15 à 12 h 15
- Exercices avancés : les lundis et mercredis de 12 h 15 à 13 h 15

Ces cours sont offerts depuis plusieurs années et sont animés par une travailleuse communautaire formée. L'animatrice arrive généralement 30 minutes en avance pour la préparation et quitte avant 14 h.

Les participants apprécient grandement ces sessions et souhaitent poursuivre de la même façon. L'activité est offerte gratuitement à l'ensemble de la communauté durant toute l'année. Comme toujours, nous nous assurons de remettre les lieux impeccables.

Nous aimerions aussi continuer à avoir accès à de l'espace de rangement pour l'équipement nécessaire, présentement remisé dans une salle proche de la cuisine; fermée à clé.

Pour plus de détails, vous pouvez contacter Carole Godmaire, travailleuse communautaire, au 705-567-1414.

Votre collaboration est toujours grandement appréciée afin de travailler ensemble pour le bien-être de la communauté.

Nous vous remercions à l'avance pour votre considération

Jocelyne Maxwell
Directrice générale

Report to Council: Committee Status and Concerns

8 (h)

Date: October 7, 2025

Prepared by: Councillor Francine Plante

This report provides an overview of the current status, and operational concerns facing the following standing committees:

- **Recreation Committee**
- **Tourism Committee**
- **Strategic Planning Committee**

It is intended to support council discussion and decision-making regarding committee viability, volunteer shortages, and the sustainability of planned events and initiatives.

General Member Update

At this time, **all three committees are short of members**, with several key resignations having occurred in recent weeks. One committee member has stepped down from **all committee roles**, citing a lack of time to commit to ongoing responsibilities. This has significantly impacted the capacity of each committee to fulfill its mandate.

Recreation Committee

Current Committee Members

Following the recent resignation, the Recreation Committee now consists of:

- One active member
- Chair and Co-Chair

This leaves 3 people responsible for planning and running upcoming events , a situation that is **not sustainable**.

Concerns

- **Event Supervision and Safety:**
Events such as the Halloween Dance for children require adequate adult supervision to ensure safety. Although there are no strict guidelines on supervisor-to-child ratios, the township would remain **liable** in the event of an incident
- **Committee Viability:**
The Recreation Committee is experiencing rapid member turnover and unfilled vacancies. Without sufficient support, its ability to safely and effectively offer community events is in jeopardy.

Recommendations

Council is asked to discuss and provide guidance on:

- Whether planned events should proceed under current conditions
- Whether to **pause events temporarily** until the committee is adequately staffed

Conclusion

All three standing committees — Recreation, Tourism, and Strategic Planning — are currently facing **critical membership shortages**, due in part to recent resignations and ongoing difficulties recruiting volunteers.

This situation compromises the committees' ability to:

- Plan and deliver events
- Maintain safety and accountability
- Fulfill their mandates effectively

Council action is urgently required to address volunteer shortages, determine the future of planned events, and consider whether temporary suspensions or restructuring are needed.
